

Execution of special geotechnical works — Soil nailing

ICS 93.020

National foreword

This British Standard is the UK implementation of EN 14490:2010. It partially supersedes BS 8006:1995 which is currently being revised in order to remove conflicting material and to include technical updates. In the meantime, where conflict exists between the two standards, the provisions of BS EN 14490 take precedence.

The UK participation in its preparation was entrusted to Technical Committee B/526/4, Strengthened/reinforced soils and other fills.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard cannot confer immunity from legal obligations.

This British Standard was published under the authority of the Standards Policy and Strategy Committee on 31 July 2010
