

BSI Standards Publication

Railway applications - Rolling stock - Head stock layout

National foreword

This British Standard is the UK implementation of EN 16839:2017.

The UK committee draws users' attention to the distinction between normative and informative elements, as defined in Clause 3 of the CEN/CENELEC Internal Regulations, Part 3.

Normative: Requirements conveying criteria to be fulfilled if compliance with the document is to be claimed and from which no deviation is permitted.

Informative: Information intended to assist the understanding or use of the document. Informative annexes do not contain requirements, except as optional requirements, and are not mandatory. For example, a test method may contain requirements, but there is no need to comply with these requirements to claim compliance with the standard.

The UK committee draws users' attention to BS EN 16839 Annex D (normative) Special national conditions for the UK Clause 4.

The UK participation in its preparation was entrusted to Technical Committee RAE/3/-/7, Railway applications - Couplers.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
