

Domestic cooking appliances burning gas —

Part 2-2: Rational use of energy — Appliances having forced-convection ovens and/or grills

The European Standard EN 30-2-2:1999 has the status of a
British Standard

ICS 97.040.20

National foreword

This British Standard is the English language version of EN 30-2-2:1999. It partially supersedes both BS 5386-3, which was identical to EN 30 prior to the publication of Amendment No. 2 to the British Standard and BS 5386-4. It is recognized that BS 5386-3 and -4 may have been used as the basis for CE marking until quite recently and are being declared obsolescent in order that they are available for reference only. EN 30-2-2 should be considered as the current British Standard for the particular aspects it covers. BS 5386-3 and -4 will be withdrawn before 31 December 2002.

The UK participation in its preparation was entrusted to Technical Committee GSE/35, Gas cooking appliances (domestic), which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
