

BSI Standards Publication

**Water and soil quality — Determination of
the toxic effect of sediment and soil samples
on growth, fertility and reproduction of
Caenorhabditis elegans (Nematoda)**

National foreword

This British Standard is the UK implementation of EN ISO 10872:2021. It is identical to ISO 10872:2020. It supersedes BS ISO 10872:2020, which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee EH/3/5, Biological Methods.

A list of organizations represented on this committee can be obtained on request to its committee manager.

Contractual and legal considerations

This publication has been prepared in good faith, however no representation, warranty, assurance or undertaking (express or implied) is or will be made, and no responsibility or liability is or will be accepted by BSI in relation to the adequacy, accuracy, completeness or reasonableness of this publication. All and any such responsibility and liability is expressly disclaimed to the full extent permitted by the law.

This publication is provided as is, and is to be used at the recipient's own risk.

The recipient is advised to consider seeking professional guidance with respect to its use of this publication.

This publication is not intended to constitute a contract. Users are responsible for its correct application.
