

BSI Standards Publication

**Acoustics — Noise emitted
by machinery and equipment
— Determination of emission
sound pressure levels at a work
station and at other specified
positions in an essentially free
field over a reflecting plane
with negligible environmental
corrections**

National foreword

This British Standard is the UK implementation of EN ISO 11201:2010. It supersedes BS EN ISO 11201:2009 which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee EH/1/4, Machinery noise.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
