

BSI Standards Publication

Air filters for general ventilation

Part 4: Conditioning method to determine the minimum fractional test efficiency

National foreword

This British Standard is the UK implementation of EN ISO 16890-4:2022. It is identical to ISO 16890-4:2022. It supersedes BS EN ISO 16890-4:2016, which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee MCE/21, Filters for gases and liquids.

A list of organizations represented on this committee can be obtained on request to its committee manager.

BSI, as a member of CEN, is obliged to publish EN ISO 16890-4:2022 as a British Standard. However, attention is drawn to the fact that during the development of this European Standard, the UK committee voted against its approval.

The UK committee submitted a negative vote due to the changes made between BS EN ISO 16890-4:2016 (Subclause 9.1) and BS EN ISO 16890-4:2022 (Subclause 9.3) regarding the criteria for conditioning (IPA vapour discharge) a second new test device (filter).
