Solid biofuels — Determination of fines content in quantities of pellets (ISO 18846:2016)

National foreword

This British Standard is the UK implementation of EN ISO 18846:2016.

BSI, as a member of CEN, is obliged to publish EN ISO 18846 as a British Standard. However, attention is drawn to the fact that during the development of this European Standard, the UK committee voted against its approval as a European Standard.

The UK committee's main concerns are:

- some of the terminology used creates ambiguity;
- the supported methodology could result in incomplete separation of particle sizes;
- the standard is too prescriptive with regards to recommended equipment.

The UK participation in its preparation was entrusted to Technical Committee PTI/17, Solid biofuels.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
