

BSI Standards Publication

Safety of machinery - Instruction handbook - General drafting principles

National foreword

This British Standard is the UK implementation of EN ISO 20607:2019. It is identical to ISO 20607:2019.

The UK participation in its preparation was entrusted to Technical Committee MCE/3, Safeguarding of machinery.

A list of organizations represented on this committee can be obtained on request to its secretary.

BSI, as a member of CEN, is obliged to publish EN ISO 20607:2019 as a British Standard. However, attention is drawn to the fact that during the development of this European Standard, the UK committee voted against its approval.

The UK committee voted against this standard as the presentational aspects of instructions for use are covered by IEC/IEEE 82079-1:2019. Therefore, in the opinion of the committee, EN ISO 20607:2019 should have been limited to specifying the content to be covered in instructions for machinery, while making normative reference to IEC/IEEE 82079-1:2019 in respect of presentation.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
