

BRITISH STANDARD

**BS EN ISO 9029
: 1997
BS 2000 :
Part 358 : 1997
ISO 9029 : 1990**

Methods of test for

Petroleum and its products

**Part 358. Crude petroleum - Determination of
water - Distillation method**

(Identical with IP 358/97)

The European Standard EN ISO 9029 : 1995 has the status of a
British Standard

National foreword

This British Standard was published under the authority of the Materials and Chemicals Sector Board and comes into effect on 1st March 1997. It is the English language version of EN ISO 9029 : 1995 *Crude petroleum - Determination of water - Distillation method*, published by the European Committee for Standardization (CEN), which endorses ISO 9029 : 1990, published by the International Organization for Standardization (ISO).

This British Standard supersedes BS EN ISO 9029 : 1995 (previously numbered as BS 4385 : Part 1), which is withdrawn.

BS 2000 comprises a series of test methods for petroleum and its products that are published by the Institute of Petroleum (IP) and have been accorded the status of a British Standard. Each method should be read in conjunction with the preliminary pages of 'IP Standard methods for analysis and testing of petroleum and related products and British Standard 2000 Parts' which gives details of the BSI/IP agreement for publication of the series, provides general information on safety precautions, sampling and other matters, and lists the methods published as Parts of BS 2000.

Under the terms of the agreement between BSI and the Institute of Petroleum, BS 2000 : Part 358 / BS EN ISO 9029 will be published by the IP (in 'Standard methods for analysis and testing of petroleum and related products and British Standard 2000 Parts' and as a separate publication). The numbering of the Parts of BS 2000 follows that of the corresponding IP methods. BS 2000 : Part 358 : 1997 is thus identical with IP 358/97.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
