

BS EN ISO/IEC 13273-2:2016

BSI Standards Publication

Energy efficiency and renewable energy sources — Common international terminology

Part 2: Renewable energy sources (ISO/IEC
13273-2:2015)

National foreword

This British Standard is the UK implementation of EN ISO/IEC 13273-2:2016. It is identical to ISO/IEC 13273-2:2015. Together with BS EN ISO/IEC 13273-1:2016 it supersedes PD CEN/CLC TR 16103:2010 which is withdrawn.

BSI, as a member of CEN, is obliged to publish EN ISO/IEC 13273-2:2016 as a British Standard. However, during the development of this document as an International Standard the UK committee voted against its approval.

The UK committee is of the opinion that some of the terms defined are not commonly used in the UK and there are alternative terms which are used more widely. In addition, the committee considered that many of the definitions were insufficiently practical to be of use to typical users of standards, and that the adoption of this standard could potentially lead to a misunderstanding of those terms.

The UK participation in its preparation was entrusted to Technical Committee SEM/1, Energy Management.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
