Semiconductor devices - Micro-electromechanical devices

Part 29: Electromechanical relaxation test method for freestanding conductive thin films under room temperature

National foreword

This British Standard is the UK implementation of IEC 62047-29:2017.

The UK participation in its preparation was entrusted to Technical Committee EPL/47, Semiconductors.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
