

BSI Standards Publication

Mechanical vibration — Measurement of vibration generated internally in railway tunnels by the passage of trains

National foreword

This British Standard is the UK implementation of ISO 10815:2016. It supersedes BS ISO 10815:1996 which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee GME/21/3, Mechanical vibration, shock and condition monitoring - Measurement and evaluation of mechanical vibration and shock in stationary structures.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
