Microbeam analysis — Electron probe microanalysis — Guidelines for the specification of certified reference materials (CRMs)

bsi.

...making excellence a habit.™

National foreword

This British Standard is the UK implementation of ISO 14595:2014. It supersedes BS ISO 14595:2003, which is withdrawn.

Attention is drawn to the fact that, during the development of this International Standard, the UK committee voted against its approval as an International Standard.

This was due to an ambiguity in the formatting of equations 4, 20 and A8. The expression of the term ‘sigma subscript the mean value ($\overline{w}$) squared’ is shown as follows:

$$\sigma_{\overline{w}}$$

The UK committee would expect this to be displayed as:

$$\sigma_{\overline{w}}^2$$

The UK participation in its preparation was entrusted to Technical Committee CII/9, Microbeam analysis.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
