

BSI Standards Publication

Methods for the calibration of vibration and shock transducers

Part 33: Testing of magnetic field sensitivity

National foreword

This British Standard is the UK implementation of ISO 16063-33:2017. It supersedes BS 6955-19:1994, which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee GME/21/2, Mechanical vibration, shock and condition monitoring - Vibration and shock measuring instruments and testing equipment.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
