

BSI Standards Publication

Guidelines for assessing the adverse environmental impact of fire effluents

Part 2: Methodology for compiling data on environmentally significant emissions from fires

National foreword

This British Standard is the UK implementation of ISO 26367-2:2017.

The UK participation in its preparation was entrusted to Technical Committee FSH/16, Hazards to life from fire.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
