

Rubber and plastics test equipment — Tensile, flexural and compression types (constant rate of traverse) — Specification

ICS 83.200

National foreword

This British Standard reproduces verbatim ISO 5893:2002 and implements it as the UK national standard. It supersedes BS 5214-1:1995 which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee PRI/20, Accuracy of rubber and plastics test equipment, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

This British Standard, having been prepared under the direction of the Materials and Chemicals Sector Policy and Strategy Committee, was published under the authority of the Standards Policy and Strategy Committee on 7 August 2002
