Rubber — Compatibility between hydraulic fluids and standard elastomeric materials

bsi.

...making excellence a habit.™

National foreword

This British Standard is the UK implementation of ISO 6072:2011. It supersedes BS ISO 6072:2002, which is withdrawn.

The UK committee would like to highlight that Annex C ‘Guidelines on elastomer compatibility’ in BS ISO 6072:2002 has been removed in BS ISO 6072:2011. They considered that this annex provides useful guidance and have retained it as National Annex NA (informative).

The UK participation in its preparation was entrusted to Technical Committee PRI/54, Vulcanised rubber compounds.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
