

BS ISO 9564-4:2016

BSI Standards Publication

Financial services — Personal Identification Number (PIN) management and security

Part 4: Requirements for PIN handling in eCommerce for Payment Transactions

bsi.

...making excellence a habit.™

National foreword

This British Standard is the UK implementation of ISO 9564-4:2016.

The UK committee supports this International Standard in principle, but notes that PINs are not commonly used in "e-commerce" card payments in the UK and therefore does not envisage it being widely used.

The UK participation in its preparation was entrusted to Technical Committee IST/12, Financial services.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
