## Hot-rolled steel bars — Part 3 : Dimensions of flat bars

*Barres en acier laminées à chaud —  
Partie 3 : Dimensions des barres plates*

**First edition — 1980-11-01**

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 1035/3 was developed by Technical Committee ISO/TC 17, *Steel*, and was circulated to the member bodies in December 1978.

It has been approved by the member bodies of the following countries :

|                     |                        |                       |
|---------------------|------------------------|-----------------------|
| Austria             | Germany, F. R.         | Romania               |
| Belgium             | Hungary                | South Africa, Rep. of |
| Bulgaria            | India                  | Spain                 |
| Canada              | Italy                  | Sweden                |
| Czechoslovakia      | Korea, Dem. P. Rep. of | Switzerland           |
| Denmark             | Korea, Rep. of         | Thailand              |
| Egypt, Arab Rep. of | Netherlands            | Turkey                |
| Finland             | New Zealand            | United Kingdom        |
| France              | Poland                 | USSR                  |

The member bodies of the following countries expressed disapproval of the document on technical grounds :

Australia  
Japan  
USA
