Light-gauge metal containers — Round open-top cans — Cans defined by their nominal gross lidded capacities

*Emballages métalliques légers — Boîtes rondes serties — Boîtes définies
par leur capacité totale nominale*

Reference number
ISO 10653:1993(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 10653 was prepared by Technical Committee ISO/TC 52, *Light gauge metal containers*, Sub-Committee SC 4, *Open top containers*.

Together with ISO 10654, ISO/TR 11761, ISO/TR 11762 and ISO/TR 11776, this first edition of ISO 10653 cancels and replaces ISO 3004-1:1986, ISO 3004-2:1989, ISO 3004-3:1986, ISO 3004-4:1986, ISO 3004-5:1988 and ISO 3004-6:1986, which have been revised and condensed.

Annex A of this International Standard is for information only.
