**Ophthalmic optics — Format of digital data  
files for data transfer for the profiling of  
spectacle lenses —**

**Part 1:**  
**Two-dimensional tracers**

*Optique ophtalmique — Format fichiers numériques utilisés pour le transfert  
d'information en façonnage des verres de lunettes —*

*Partie 1: Palpeurs bidimensionnels*

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 11715 was prepared by Technical Committee ISO/TC 172, *Optics and optical instruments*, Subcommittee SC 7, *Ophthalmic optics and instruments*.

International Standard ISO 11715 consists of the following parts, under the general title: *Ophthalmic optics — Format of digital data files for data transfer for the profiling of spectacle lenses*

- *Part 1: Two-dimensional tracers*
- *Part 2: Three-dimensional tracers*

Annexes A and B of this part of ISO 11715 are for information only.
