

Straight-sided splines for cylindrical shafts with internal centering — Dimensions, tolerances and verification

Cannelures cylindriques à flancs parallèles, à centrage intérieur — Dimensions, tolérances et vérification

Second edition — 1982-10-01

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 14 was developed by Technical Committee ISO/TC 32, *Splines and serrations*, and was circulated to the member bodies in June 1980.

It has been approved by the member bodies of the following countries :

Australia	Germany, F. R.	Romania
Austria	India	South Africa, Rep. of
Belgium	Ireland	Spain
Brazil	Italy	Sweden
Czechoslovakia	Japan	United Kingdom
France	Korea, Rep. of	USSR

The member body of the following country expressed disapproval of the document on technical grounds :

China

This second edition cancels and replaces the first edition (i.e. ISO 14-1978).
