

INTERNATIONAL STANDARD

ISO
1505

Second edition
1993-02-15

Textile machinery — Widths relating to dyeing and finishing machines — Definitions and range of nominal widths

*Matériel pour l'industrie textile — Largeurs relatives aux matériels de
teinture et de finissage — Définitions et gamme de largeurs nominales*

Reference number
ISO 1505:1993(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 1505 was prepared by Technical Committee ISO/TC 72, *Textile machinery and allied machinery and accessories*, Subcommittee SC 4, *Dyeing, finishing and allied machinery and accessories*.

This second edition cancels and replaces the first edition (ISO 1505:1982), of which it constitutes a technical revision.

Annex A of this International Standard is for information only.
