Paints and varnishes — Sampling of products in liquid or paste form

*Peintures et vernis — Échantillonnage des produits sous forme liquide
ou en pâte*

Reference number
ISO 1512:1991(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 1512 was prepared by Technical Committee ISO/TC 35, *Paints and varnishes*, Sub-Committee SC 9, *General test methods for paints and varnishes*.

This second edition cancels and replaces the first edition (ISO 1512:1974). This edition of ISO 1512 differs from the previous edition by specifically excluding the sampling of coating powders and by including an abbreviated procedure (see 8.2.1.2) when the containers to be sampled are from a single batch. The safety precautions to be considered have also been revised.

Annex A of this International Standard is for information only.
