

INTERNATIONAL STANDARD

ISO
161-2

Second edition
1996-12-15

Thermoplastics pipes for the conveyance of fluids — Nominal outside diameters and nominal pressures —

Part 2: Inch-based series

*Tubes en matières thermoplastiques pour le transport des fluides —
Diamètres extérieurs nominaux et pressions nominales —*

Partie 2: Série basée sur les inches

Reference number
ISO 161-2:1996(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 161-2 was prepared by Technical Committee ISO/TC 138, *Plastics pipes, fittings and valves for the transport of fluids*.

This second edition cancels and replaces the first edition (ISO 161-2:1977), which has been technically revised.

ISO 161 consists of the following parts, under the general title *Thermoplastics pipes for the conveyance of fluids — Nominal outside diameters and nominal pressures*:

- Part 1: *Metric series*
- Part 2: *Inch-based series*

Annex A of this part of ISO 161 is for information only.
