Copper and copper alloys — Rockwell hardness test (B, F and G scales)

First edition — 1973-11-01

UDC 669.3 : 620.178.152.42

Ref. No. ISO 2713-1973 (E)

Descriptors : copper, copper alloys, tests, hardness tests, Rockwell hardness.

Price based on 5 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 2713 was drawn up by Technical Committee ISO/TC 26, *Copper and copper alloys*, and circulated to the Member Bodies in June 1972.

It has been approved by the Member Bodies of the following countries :

Austria	Hungary	Romania
Belgium	India	South Africa, Rep. of
Brazil	Ireland	Sweden
Chile	Morocco	Switzerland
Czechoslovakia	Netherlands	Turkey
Denmark	New Zealand	United Kingdom
Egypt, Arab Rep. of	Norway	U.S.A.
Finland	Poland	U.S.S.R.
France	Portugal	

The Member Body of the following country expressed disapproval of the document on technical grounds :

Australia
