
**Cheese and processed cheese products —
Determination of citric acid content —
Enzymatic method**

*Fromages et fromages fondus — Détermination de la teneur en acide
citrique — Méthode enzymatique*

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 2963 was prepared by Technical Committee ISO/TC 34, *Agricultural food products*, Subcommittee SC 5, *Milk and milk products*, in collaboration with the International Dairy Federation (IDF) and the AOAC INTERNATIONAL, and will also be published by these organizations.

This second edition cancels and replaces the first edition (ISO 2963:1974), which has been technically revised.

Annex A forms an integral part of this International Standard. Annexes B and C are for information only.
