

Unplasticized polyvinyl chloride (PVC) pipes for potable water supply — Extractability of lead and tin — Test method

Tubes en polychlorure de vinyle (PVC) non plastifié pour l'alimentation en eau potable — Extractibilité du plomb et de l'étain — Méthode d'essai

First edition — 1977-03-15

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3114 was drawn up by Technical Committee ISO/TC 138, *Plastics pipes, fittings and valves for the transport of fluids*, and was circulated to the Member Bodies in May 1973.

It has been approved by the Member Bodies of the following countries :

Australia	Ireland	Portugal
Austria	Israel	Romania
Belgium	Italy	Spain
Bulgaria	Japan	Sweden
Czechoslovakia	Korea, Dem. P. Rep. of	Switzerland
Denmark	Mexico	Thailand
Egypt, Arab Rep. of	Netherlands	Turkey
Finland	Norway	United Kingdom
India	Poland	Yugoslavia

The Member Bodies of the following countries expressed disapproval of the document on technical grounds :

Canada
U.S.A.
