Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3649 was developed by Technical Committee ISO/TC 142, *Cleaning equipment for air and other gases*, and was circulated to the member bodies in August 1979.

It has been approved by the member bodies of the following countries :

Australia	France	Poland
Austria	Germany, F. R.	Romania
Belgium	India	South Africa, Rep. of
Chile	Italy	United Kingdom
Czechoslovakia	Japan	Yugoslavia
Egypt, Arab Rep. of	Libyan Arab Jamahiriya	
Finland	Philippines	

No member body expressed disapproval of the document.
