Ammonium nitrate for industrial use — Determination of chloride ions content — Potentiometric method

Nitrate d'ammonium à usage industriel — Dosage des ions chlorure — Méthode potentiométrique

First edition — 1977-12-15

FEB 09 1978

UDC 661.525 : 546.132 : 543.257

Ref. No. ISO 3695-1977 (E)

Descriptors : ammonium nitrate, chemical analysis, determination of content, chlorides, potentiometric analysis.

Price based on 4 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3695 was developed by Technical Committee ISO/TC 47, *Chemistry*, and was circulated to the member bodies in January 1975.

It has been approved by the member bodies of the following countries :

Austria	Ireland	South Africa, Rep. of
Belgium	Israel	Spain
Brazil	Italy	Switzerland
Bulgaria	Netherlands	Turkey
France	New Zealand	United Kingdom
Germany	Poland	U.S.S.R.
Hungary	Portugal	Yugoslavia
India	Romania	

No member body expressed disapproval of the document.
