## Potassium hydroxide for industrial use — Determination of calcium and magnesium contents — Flame atomic absorption method

*Hydroxyde de potassium à usage industriel — Dosages du calcium et du magnésium — Méthode par absorption atomique dans la flamme*

First edition — 1976-12-15

DEC 14 1976

ANSI Internat Doc secr

UDC 661.832.23 : 546.46 : 546.41 : 543.42

Ref. No. ISO 3698-1976 (E)

**Descriptors :** chemical compounds, potassium hydroxide, chemical analysis, determination of content, calcium, magnesium, spectrophotometric analysis, flame photometric analysis

Price based on 4 pages

## FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3698 was drawn up by Technical Committee ISO/TC 47, *Chemistry*, and was circulated to the Member Bodies in February 1975.

It has been approved by the Member Bodies of the following countries :

|          |                       |                |
|----------|-----------------------|----------------|
| Austria  | Israel                | Spain          |
| Belgium  | Italy                 | Switzerland    |
| Brazil   | Netherlands           | Turkey         |
| Bulgaria | New Zealand           | United Kingdom |
| France   | Poland                | U.S.S.R.       |
| Germany  | Portugal              | Yugoslavia     |
| Hungary  | Romania               |                |
| India    | South Africa, Rep. of |                |

No Member Body expressed disapproval of the document.

This International Standard has also been approved by the International Union of Pure and Applied Chemistry (IUPAC).
