Descriptors : fertilizers, manure, sampling.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3963 was developed by Technical Committee ISO/TC 134, *Fertilizers and soil conditioners*, and was circulated to the member bodies in September 1975.

It has been approved by the member bodies of the following countries :

Austria	India	Portugal
Brazil	Iran	Romania
Czechoslovakia	Israel	South Africa, Rep. of
Egypt, Arab Rep. of	Italy	Spain
Finland	Netherlands	Thailand
France	New Zealand	Turkey
Germany	Norway	United Kingdom
Hungary	Poland	Yugoslavia

The member body of the following country expressed disapproval of the document on technical grounds :

U.S.S.R.
