Ref. No. ISO 4464-1980 (E)

Descriptors : buildings, tolerances (mechanics), dimensional tolerances, angular tolerances, tolerances of position, form tolerances.

Price based on 9 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4464 was developed by Technical Committee ISO/TC 59, *Building construction*, and was circulated to the member bodies in February 1977.

It has been approved by the member bodies of the following countries :

Australia	Ireland	South Africa, Rep. of
Belgium	Israel	Spain
Bulgaria	Italy	Sweden
Canada	Mexico	Turkey
Czechoslovakia	Netherlands	United Kingdom
Denmark	New Zealand	USSR
Finland	Norway	Yugoslavia
Germany, F. R.	Poland	
Hungary	Romania	

No member body expressed disapproval of the document.
