Hydraulic fluid power — Filters — Multi-pass method for evaluating filtration performance

Transmissions hydrauliques — Filtres — Évaluation du rendement par la méthode de filtration en circuit fermé

First edition — 1981-04-01

UDC 621.648.5

Ref. No. ISO 4572-1981 (E)

Descriptors : hydraulic fluid power, hydraulic equipment, filters, tests, performance tests, test equipment, filtration analysis, efficiency.

Price based on 28 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4572 was developed by Technical Committee ISO/TC 131, *Fluid power systems and components*, and was circulated to the member bodies in December 1978.

It has been approved by the member bodies of the following countries :

Australia	Hungary	Romania
Austria	India	Spain
Belgium	Italy	Sweden
Canada	Japan	Turkey
Chile	Korea, Rep. of	United Kingdom
Czechoslovakia	Netherlands	USA
Finland	Norway	USSR
Germany, F.R.	Poland	Yugoslavia

The member bodies of the following countries expressed disapproval of the document on technical grounds :

France
South Africa, Rep. of
