Plastics — Polypropylene and propylene-copolymers — Determination of thermal oxidative stability in air — Oven method

*Plastiques — Polypropylène et copolymères de propylène — Détermination de la stabilité à l'oxydation à chaud dans l'air —
Méthode à l'étuve*

First edition — 1983-08-15

UDC 678.742.3-13 : 620.193.54

Ref. No. ISO 4577-1983 (E)

Descriptors : plastics, polypropylene, stability tests, thermal stability, high temperature tests, oxidation tests, ageing tests (materials).

Price based on 4 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4577 was developed by Technical Committee ISO/TC 61, *Plastics*, and was circulated to the member bodies in May 1982.

It has been approved by the member bodies of the following countries:

Australia	Germany, F.R.	Romania
Austria	Hungary	South Africa, Rep. of
Belgium	Iran	Spain
Brazil	Israel	Sri Lanka
Canada	Italy	Sweden
China	Jamaica	Switzerland
Czechoslovakia	Japan	United Kingdom
Egypt, Arab Rep. of	Korea, Rep. of	USA
Finland	Netherlands	USSR
France	Poland	

The member body of the following country expressed disapproval of the document on technical grounds:

India
