## **Plastics — Ethylene/vinyl acetate (E/VAC) moulding and extrusion materials —**

### **Part 2:**

Preparation of test specimens and  
determination of properties

*Plastiques — Éthylène/acétate de vinyle (E/VAC) pour moulage et  
extrusion —*

*Partie 2: Préparation des éprouvettes et détermination des propriétés*

Reference number  
ISO 4613-2:1995(E)

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 4613-2 was prepared by Technical Committee ISO/TC 61, *Plastics*, Subcommittee SC 9, *Thermoplastic materials*.

This second edition cancels and replaces the first edition (ISO 4613-2:1989) and includes the following changes:

The text has been brought into accordance with the frame text developed by SC 9. The table of test methods has been revised in accordance with ISO 10350.

ISO 4613 consists of the following parts, under the general title *Plastics — Ethylene/vinyl acetate (E/VAC) moulding and extrusion materials*:

- *Part 1: Designation and specification*
- *Part 2: Preparation of test specimens and determination of properties*
