

INTERNATIONAL STANDARD

**ISO
4646**

Second edition
1989-07-15

Rubber- or plastics-coated fabrics — Low-temperature impact test

Supports textiles revêtus de caoutchouc ou de plastique — Essai de choc à basse température

Reference number
ISO 4646 : 1989 (E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 4646 was prepared by Technical Committee ISO/TC 45, *Rubber and rubber products*.

This second edition cancels and replaces the first edition (ISO 4646 : 1978), clauses 3, 7 and 8 of which have been technically revised.

Annex A of this International Standard is for information only.
