

INTERNATIONAL STANDARD

ISO
4950-2

Second edition
1995-08-15

High yield strength flat steel products —

Part 2:

Products supplied in the normalized or controlled rolled condition

Produits plats en acier à haute limite d'élasticité

Part 2: Produits livrés à l'état normalisé ou de laminage contrôlé

Reference number
ISO 4950-2:1995(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 4950-2 was prepared by Technical Committee ISO/TC 17, *Steel*, Subcommittee SC 3, *Steels for structural purposes*.

This second edition cancels and replaces the first edition (ISO 4950-2: 1981), which has been technically revised.

ISO 4950 consists of the following parts, under the general title *High yield strength flat steel products*:

- *Part 1: General requirements*
- *Part 2: Products supplied in the normalized or controlled rolled condition*
- *Part 3: Products supplied in the heat-treated (quenched + tempered) condition*

Annex A of this part of ISO 4950 is for information only.
