
International Standard

4977/1

INTERNATIONAL ORGANIZATION FOR STANDARDIZATION • МЕЖДУНАРОДНАЯ ОРГАНИЗАЦИЯ ПО СТАНДАРТИЗАЦИИ • ORGANISATION INTERNATIONALE DE NORMALISATION

Double cold-reduced electrolytic tinplate — Part 1 : Sheet

Fer-blanc électrolytique laminé à froid par double réduction — Partie 1 : Feuilles

First edition — 1984-06-01

UDC 669.14-122 : 62-416

Ref. No. ISO 4977/1-1984 (E)

Descriptors : iron-and steel products, cold formed products, metal plates, tinplate, mechanical properties, dimensions, thickness, dimensional tolerances, tests, tin coatings, volumetric analysis, designation, marking.

Price based on 14 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4977/1 was developed by Technical Committee ISO/TC 17, *Steel*, and was circulated to the member bodies in March 1983.

It has been approved by the member bodies of the following countries :

Australia	India	Poland
Austria	Iran	South Africa, Rep. of
Belgium	Italy	Spain
Brazil	Japan	Sweden
Canada	Korea, Dem. P. Rep. of	Switzerland
China	Korea, Rep. of	Turkey
Czechoslovakia	Romania	United Kingdom
France	Netherlands	USSR
Germany, F. R.	New Zealand	
Hungary	Norway	

No member body expressed disapproval of the document.
