Starch hydrolysis products — Determination of reducing power and dextrose equivalent — Lane and Eynon constant titre method

Produits d'hydrolyse de l'amidon ou de la fécule — Détermination du pouvoir réducteur et de l'équivalent en dextrose — Méthode Lane et Eynon à titre constant

First edition — 1981-12-15

UDC 664.28 : 664.162.036 : 543.24

Ref. No. ISO 5377-1981 (E)

Descriptors : starches, tests, determination, mass losses, dry matter, titration.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 5377 was developed by Technical Committee ISO/TC 93, *Starch (including derivatives and by-products)*, and was circulated to the member bodies in November 1980.

It has been approved by the member bodies of the following countries :

Australia	Netherlands
Austria	Romania
Egypt, Arab Rep. of	South Africa, Rep. of
France	USA
Iran	USSR

No member body expressed disapproval of the document.
