Ref. No. ISO 56/II-1979 (E)

Descriptors : shellac, materials specifications, chemical analysis, tests, sampling.

Price based on 35 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 56/II was developed by Technical Committee ISO/TC 50, *Lac*, and was circulated to the member bodies in November 1976.

It has been approved by the member bodies of the following countries :

Australia	Korea, Rep. of	Sweden
Austria	Mexico	Turkey
Czechoslovakia	Netherlands	Yugoslavia
India	Romania	

The member body of the following country expressed disapproval of the document on technical grounds :

Canada

This International Standard cancels and replaces ISO Recommendation R 56-1957 of which it constitutes a technical revision.
