Sulphur for industrial use — Determination of chloride content — Photometric method

Soufre à usage industriel — Dosage des chlorures — Méthode photométrique

First edition — 1978-11-15

UDC 661.21 : 546.13 : 543.42

Ref. No. ISO 5793-1978 (E)

Descriptors : sulphur, chemical analysis, determination of content, chlorides, spectrophotometric analysis.

Price based on 3 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 5793 was developed by Technical Committee ISO/TC 47, *Chemistry*, and was circulated to the member bodies in June 1977.

It has been approved by the member bodies of the following countries :

Austria	Germany, F. R.	Romania
Belgium	Hungary	South Africa, Rep. of
Brazil	India	Switzerland
Bulgaria	Israel	Turkey
Chile	Italy	United Kingdom
Czechoslovakia	Kenya	U.S.S.R.
Egypt, Arab Rep. of	Korea, Rep. of	Yugoslavia
France	Poland	

No member body expressed disapproval of the document.

This International Standard has also been approved by the International Union of Pure and Applied Chemistry (IUPAC).
