Information processing — Recording characteristics of instrumentation magnetic tape (including telemetry systems) — Interchange requirements

Traitement de l'information — Caractéristiques d'enregistrement de la bande magnétique de mesure (y compris les systèmes de télémessure) — Spécifications d'échanges

First edition — 1985-03-01

UDC 681.327.64

Ref. No. ISO 6068-1985 (E)

Descriptors : data processing, information interchange, magnetic tapes, tape recorders, specifications, magnetic properties, tests, magnetic tests, measuring instruments.

Price based on 98 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 6068 was prepared by Technical Committee ISO/TC 97, *Information processing systems*.

It cancels and replaces ISO 3413-1975 and ISO 3615-1976 of which it constitutes a technical revision.
