

Laboratory glassware — Density hydrometers for general purposes — Part 2 : Test methods and use

Verrerie de laboratoire — Aréomètres à masse volumique d'usage général — Partie 2 : Méthodes d'essai et d'utilisation

First edition — 1981-09-01

UDC 542.3 : 531.756

Ref. No. ISO 649/2-1981 (E)

Descriptors : glassware, laboratory glassware, measuring instruments, hydrometers, density (mass/volume), tests, utilization, interfacial tension, dimensions, specifications.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 649/2 was developed by Technical Committee ISO/TC 48, *Laboratory glassware and related apparatus*, and was circulated to the member bodies in September 1979.

It has been approved by the member bodies of the following countries :

Australia	India	Portugal
Brazil	Italy	Romania
Canada	Korea, Rep. of	South Africa, Rep. of
Czechoslovakia	Libyan Arab Jamahiriya	Spain
France	Mexico	United Kingdom
Germany, F.R.	Netherlands	USSR
Hungary	Poland	

No member body expressed disapproval of the document.

International Standards ISO 649/1 and ISO 649/2 cancel and replace ISO Recommendation R 649-1968, of which they constitute a technical revision.
