

INTERNATIONAL STANDARD

ISO
6524

Second edition
1992-09-15

Plain bearings — Thin-walled half-bearings — Checking of peripheral length

*Paliers lisses — Demi-coussinets minces — Contrôle de la longueur
développée*

Reference number
ISO 6524:1992(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 6524 was prepared by Technical Committee ISO/TC 123, *Plain bearings*, Sub-Committee SC 3, *Dimensions, tolerances and construction details*.

This second edition cancels and replaces the first edition (ISO 6524:1983), of which it constitutes a technical revision.

Annexes A, B, C, D and E form an integral part of this International Standard.
