

INTERNATIONAL STANDARD

ISO
6528-1

Second edition
1992-08-01

Rubber — Determination of total sulfur content —

Part 1: Oxygen combustion flask method

Caoutchouc — Dosage du soufre total —

Partie 1: Méthode par combustion dans une fiole d'oxygène

Reference number
ISO 6528-1:1992(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 6528-1 was prepared by Technical Committee ISO/TC 45, *Rubber and rubber products*.

This second edition cancels and replaces the first edition (ISO 6528-1:1984), of which it constitutes a minor revision.

ISO 6528 consists of the following parts, under the general title *Rubber — Determination of total sulfur content*:

- *Part 1: Oxygen combustion flask method*
- *Part 2: Sodium peroxide fusion method*
- *Part 3: Furnace combustion method*

Annex A of this part of ISO 6528 is for information only.
