Descriptors : iron and steel products, hot rolled products, metal sections, channel iron, dimensions, dimensional tolerances, sectional properties

Price based on 4 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 657/13 was developed by Technical Committee ISO/TC 17, *Steel*, and was circulated to the member bodies in October 1979.

It has been approved by the member bodies of the following countries :

Australia	Finland	New Zealand
Austria	France	Poland
Belgium	Germany, F.R.	Romania
Canada	Hungary	South Africa, Rep. of
Chile	India	Sweden
China	Italy	Switzerland
Czechoslovakia	Korea, Dem. P. Rep. of	Turkey
Denmark	Korea, Rep. of	USSR
Egypt, Arab Rep. of	Netherlands	

The member bodies of the following countries expressed disapproval of the document on technical grounds :

Japan
United Kingdom
USA
