## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 6741-1 was prepared by Technical Committee ISO/TC 38, *Textiles*.

This second edition cancels and replaces the first edition (ISO 6741-1 : 1987), of which it constitutes a minor revision. The only change of any technical significance is in the drying temperature specified for silk in table 1.

ISO 6741 consists of the following parts, under the general title *Textiles — Fibres and yarns — Determination of commercial mass of consignments*:

- *Part 1: Mass determination and calculations*
- *Part 2: Methods for obtaining laboratory samples*
- *Part 3: Specimen cleaning procedures*
- *Part 4: Values used for the commercial allowances and the commercial moisture regains* (Technical Report)

Annexes A, B and C form an integral part of this part of ISO 6741. Annex D is for information only.
