

INTERNATIONAL STANDARD

ISO
6810

Second edition
1995-10-01

Rubber compounding ingredients — Carbon black — Determination of surface area — CTAB adsorption methods

*Ingrédients de mélange du caoutchouc — Noir de carbone —
Détermination de la surface spécifique — Méthodes par adsorption de
CTAB*

Reference number
ISO 6810:1995(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 6810 was prepared by Technical Committee ISO/TC 45, *Rubber and rubber products*, Subcommittee SC 3, *Raw materials (including latex) for use in the rubber industry*.

This second edition cancels and replaces the first edition (ISO 6810:1985), which has been technically revised.

Annexes A and B of this International Standard are for information only.
