Tractors and machinery for agriculture and forestry — Linch pins and spring pins — Dimensions and requirements

*Tracteurs et matériels agricoles et forestiers — Goupilles à abattant et
goupilles-ressorts — Dimensions et exigences*

Reference number
ISO 7072:1993(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 7072 was prepared by Technical Committee ISO/TC 23, *Tractors and machinery for agriculture and forestry*, Sub-Committee SC 5, *Equipment for working the soil*.

This second edition cancels and replaces the first edition (ISO 7072:1982), which has been extended to include spring pins, and requirements for both pins.
